

About

What We're Doing -

We are a health resource to anyone who is seeking information and wants to learn! We are happy to provide resources and references for your own private research into cancer, diabetes, autism/mercury, multiple sclerosis, fluoride, and toxic vaccinations.

The Sacred Life Center is home to Fred Wittig's eBook "Fighting Cancer: A Battle Plan for Hope"

Through the [Healthy Way](#) store, we offer a wide variety of organic fruits and vegetables (many locally-grown), as well as supplements, herbs, teas, organic staples and all-natural personal care items. Visit the store in Sturgeon Bay, Wisconsin or call us to have items shipped straight to your door!

How You Can Help

- We connect caring, generous supporters with those in need who are facing a major health crisis (such as cancer) to sponsor their testing, consultations and supplements. Do you want to help someone who is sick and unable to afford their treatment? Contact us today — we'll tell you how it works, and how to make it tax-deductible!

We are in need of donations to further our research and continue development of our eBook "Fighting Cancer: A Battle Plan For Hope" New breakthroughs are being discovered daily, and it takes time and energy to locate, distill and write them into the plan. Your assistance makes it possible to do this work and help others beat this hideous disease.
